

SG1J

29 JULY 1986

## SESSION SUMMARY

Once again most of the ideograms appear quite similar in appearance, even though the feeling/motion differ greatly..... Still seem to be experiencing some degree of difficulty with the feeling of the site, especially with bodies of water..... Some descriptors that seem to be related to bodies of water are; across, flat, wavy, in motion.

In regard to the man-made city site, the motion/feeling was almost identical to a mountain (=). However, upon placing my finger at <sup>the</sup> peak of the ideogram I could visualize a many angled ideogram.

Such as:
